

TOKEN1909 Jingzhang AI Hub

AI-era Urban Symbiosis Design for the Centennial Railway Heritage

site_area_sqm=11412825.386 | green_ratio=0.123423 | public_space_ratio=0.073281 | layers=9

Provisional boundary: all geometry, area, ratio, phasing are provisional model values; full recalculation required after official data release; not for approval or construction.

Three Pillars Design Core

Pillar	Problem	Implementation	Result
01 Railway Heritage Backbone	Heritage strip cut by ring roads; only landscape corridor	No large demolition; developer promenade / AR / edge compute in sleepers	AI main street every day; 10-min walk to AI node
02 Industry-University-City Suture	Gates, walls, fences form breakpoints; AI locked in towers	9km triple-parallel slow-mobility belt; elevated connectors	5-min release; residents meet AI; startups in pods
03 Open-Source AI Urban Lab	AI parks only smart on renderings; scenarios go offline	Geo-fence testing: T1/T2/T3 MVPs; open interfaces	3-year revisit: Agents running; GitHub IDs growing

Three Key Areas Design

Key area	Positioning	Spatial strategy	Risks
Zhongzhiyuan AI Accelerator	Garden-style innovation block	National platforms + showcase + Qinghe culture + low-carbon	Land ownership pending
Beijing AI Origin Community	Campus-side transfer block	University innovation + open-source + talent + station	University access pending
Dazhongsi AI Cluster	Urban smart-economy block	Leading enterprises + agent formats + green composite	Heritage + property pending

Mobility & Blue-Green System

Layer	Elements	Design intent
Railway spine	9km heritage corridor, cultural narrative	AI embedded in railway space, not replacing heritage
Blue-green	Qinghe River + green belts, N-S connectivity	Walking/cycling network, blue-green public space
Slow-mobility	Breakpoint stitching, station connections	Seamless across ring roads, rail access
AI nodes	Distributed landmarks, honor display, test field	Pearl-chain of AI scenario nodes along spine

AI Scenario Nodes (10)

Open-Source Release Hall | City Agent Sandbox | Slow-Mobility Diagnosis | Talent Concierge | AI Safety Corridor | University-Enterprise Transfer | Data Element Theater | Low-Carbon Compute | Jingzhang Memory Route | Global AI Week

Phasing & Responsibility

Phase	Projects	Exit	Responsibility
M1 (0-1y)	Developer promenade / AR / compute	Fallback to ground + signage	Lab + Sub-district (TBD)
M2 (1-3y)	AI+Education / Health / Commercial	Fallback to existing footway	S&T; Commission + SOE (TBD)
M3 (3-5y)	T1/T2/T3 Agent MVPs	Fallback to indoor sandbox	District gov + Lab (TBD)
Long-term	Regional synergy + geo-fence	Internal independent operation	District gov + BTH (TBD)
