

Provisional boundary warning: all geometry, area, ratio, and phasing coverage in this board are provisional model values; full recalculation required after official SITE_BOUNDARY and KEY_AREA polygon release; not for approval or construction.

Three-Pillar Design Core

Pillar	Problem	Implementation	Expected result
01 Railway Heritage Backbone	Heritage strip cut by ring roads, walls of old buildings replaced by modern glass curtain walls, loss of historical context and identity	Heritage strip restoration, walls of old buildings replaced by modern glass curtain walls, loss of historical context and identity	Heritage strip restoration, walls of old buildings replaced by modern glass curtain walls, loss of historical context and identity
02 Industry-University-City Symbiosis	University gates, park walls, residential blocks separated by walls, lack of interaction and integration	University gates, park walls, residential blocks separated by walls, lack of interaction and integration	University gates, park walls, residential blocks separated by walls, lack of interaction and integration
03 Open-Source AI Urban Lab	Most AI parks only "smart" on rendering and public display, lack of real-time data and interaction	Most AI parks only "smart" on rendering and public display, lack of real-time data and interaction	Most AI parks only "smart" on rendering and public display, lack of real-time data and interaction

Three Key Areas Design

Key area	Positioning	Spatial strategy	Building & public space actions	Transport interface	Implementation risk
Zhonghuyuan AI Self-Innovation Campus	AI innovation hub, open-source AI research and development	Open-source AI research and development, open-source AI research and development	Open-source AI research and development, open-source AI research and development	Open-source AI research and development, open-source AI research and development	Open-source AI research and development, open-source AI research and development
Beijing AI Origin Community	AI innovation hub, open-source AI research and development	Open-source AI research and development, open-source AI research and development	Open-source AI research and development, open-source AI research and development	Open-source AI research and development, open-source AI research and development	Open-source AI research and development, open-source AI research and development
Dazhongqi AI Industry Cluster	AI innovation hub, open-source AI research and development	Open-source AI research and development, open-source AI research and development	Open-source AI research and development, open-source AI research and development	Open-source AI research and development, open-source AI research and development	Open-source AI research and development, open-source AI research and development

AI Scenarrio Cards (10)

#	Scenario	Service users	Spatial location	Data source	Privacy boundary
01	Open-Source Release Hall	Developers/enterprises/academic institutions	Public repo + model registry	Public data only, no personal profiles	
02	City Agent Sandbox	Operators/researchers	Zhonghuyuan public space	Simulated + de-identified geo-fence (conceptual option)	
03	Slow-Mobility Breakpoint	Daytime commuters	Heritage park main spine	Public data + manual no-entry zones	Commuter counts only
04	Talent Life Concierge	Faculty/students/residents	Origin west wing	Voluntary opt-in	Opt-in / opt-out anytime
05	AI Safety Governance Corridor	Governance volunteers	Dazhongqi green corridor	Standard docs	No personal data
06	University Enterprise Transfer	Yaleghua/PEU/CAS	Near-campus transfer point	Public IP records	IP license compliance
07	Data Element Theater	Citizens/visitors	Dazhongqi block	Asset registry	Asset-level, no individual
08	Low-Carbon Compute Station	Public service facilities	Edge compute nodes	Energy telemetry	Aggregated metrics only
09	Jingzhang Memory Route	Citizens/tourists	9 km heritage spine	Public heritage records	No personal data
10	Global AI Week Route	Global developers	Cross-domain public node	Public event data	Voluntary registration

Public Space Components / Signage System

Component	Material	Size	Location	AI Interface	Maintenance/Responsibility
Developer Promenade module	Weathering steel + recycled steel	4.0m x 0.6m	Railway spine edges	AR anchor + edge compute	Open-Source Lab (proposed/TBD)
Honor ring plate	Recycled sleeper + brass	0.3m x 0.3m	Open-Source Plaza	GitHub ID engraving	Honor committee (proposed/TBD)
Suture corridor	Semi-transparent PV + weathering steel	2.0m x 0.5m	Three breakpoints	Edge compute + slow-mobility	Open-Source Lab (proposed/TBD)
AI+Education block module	Weathering ground floor steel	1.5m x 1.5m	Community grounds	Education content API	Education alliance (proposed/TBD)
AI+Healthcare kiosk	Weathering steel + glass	1.5m x 1.5m	Dazhongqi south wing Triage	Remote consultation	Open-Source Lab (proposed/TBD)

Phasing & Responsibility Matrix

Phase	Project/Aspect	Decision Gates	Exit Conditions	Responsibility (proposed/TBD)
M1 (0-1y)	Developer promenade / AR and edge compute pilot project	Final design of module, right-of-way secured	Successful pilot of AR and edge compute	Open-Source Lab (proposed/TBD)
M2 (1-3y)	AI+Education / Healthcare / Cultural retail block under bridge	Final design of block, right-of-way secured	Successful pilot of AI+Education / Healthcare / Cultural retail	Open-Source Lab (proposed/TBD)
M3 (3-5y)	T1/T2/T3 Agent MVPs go-live	Public license + site authorization	Successful pilot of T1/T2/T3 Agent MVPs	Open-Source Lab (proposed/TBD)
Long-term	External regional synergy + cross-domain governance	Inter-domain governance agreement	Successful pilot of cross-domain governance	BTH Coordinated Dev. Office (proposed/TBD)
